41. Illinois government and United States government executives: What do you have to do relevant to these issues? [Answer](#)

---

# Health Department

## Reimburse executive professional services: What is it?

Reimburse means government departments compensate or remunerate an individual for the executive professional services provided.

How does Dr. Asif Qureshi get reimbursed from Medicare?

How does Dr. Asif Qureshi get reimbursed from Medicaid?

How does Dr. Asif Qureshi get reimbursed from similar government departments keeping in mind that millions of Americans and non-Americans are getting helped based on online statistics?

Statistics Relevant to Mental Health in the United States

## Statistics relevant to mental health in the United States: What do the statistics reveal?

On January 1, 2024, this was the situation: 65 million Americans rely on Medicare and will need access to mental health. Medicare gives them mental health coverage.

## Can Dr. Asif Qureshi see 65 million Americans in in-person face-to-face therapy appointments?

It is impossible. Other similar professional executive medical service providers cannot manage so many therapy appointments. Internet services have to be established the way Dr. Asif Qureshi has established them. They must be reminded about these services:

[www.queshiuniversity.com/psychiatryworld.html](http://www.queshiuniversity.com/psychiatryworld.html). Government departments must provide reimbursements for Dr. Asif Qureshi for his 23 years of executive research from 1999 to 2023 in Chicago, Illinois, United States.

## What do those on Medicare have to do for mental health?

Take a look at this: [www.queshiuniversity.com/icd10p.html](http://www.queshiuniversity.com/icd10p.html). There are links to the ICD-10 Mental Health Billable Diagnosis. Those on Medicare should discuss with others the questions Dr. Asif Qureshi authored. You will feel much better. Your mental health will improve. Medicare and similar entities must forward reimbursement to Dr. Asif Qureshi.

Read through the coping skills every day. There are at least 214 coping skills. Take a look at this: [www.queshiuniversity.com/copingskills.html](http://www.queshiuniversity.com/copingskills.html). Use one coping skill per day. You will feel much better. Your mental health will improve. Experience has shown that some people in the northern parts of North America have enrolled and are asking to die. They do not want to live because they are in such extreme mental agony. This is a neglected lot. If you read the coping skills and use one coping skill each day, your mental health will be much better. Take a look at this: [www.queshiuniversity.com/copingskills.html](http://www.queshiuniversity.com/copingskills.html).

## What is considered ICD-10 Mental Health Billable Diagnosis?

[www.queshiuniversity.com/icd10p.html](http://www.queshiuniversity.com/icd10p.html)

## What must reimbursement specialists know?

An assignment means a specified task or amount of work assigned. Claims specialists from government departments in Chicago, Illinois, United States asked Dr. Asif Qureshi to enlist soft skills and hard skills that were transferred to human services in Illinois so that executive healthcare services via the internet can be provided to others. I was on an assignment. Some officers do not understand the issues or situation. The executive research from Dr. Asif Qureshi continued for 23 years, from 1999 to 2023, in Chicago, Illinois, United States.

# Health Department

What did government executives in Illinois and the United States understand from the work of Dr. Asif Qureshi presented at [www.qureshiuniversity.com/physicians.html](http://www.qureshiuniversity.com/physicians.html)?

How do you reform healthcare administration in Illinois, the United States, and worldwide on or after November 26, 2023?

What were the issues on November 22, 2023?

Health departments in various states and countries are in shambles. On November 22, 2023, the Illinois Department of Health, the United States Department of Health and Human Services, and the World Health Organization were some of the departments in shambles. Shambles means something that is very badly organized and does not operate effectively. Guidelines must be available via the internet that the healthcare executive has authored him- or herself.

Who must approve job appointments for primary care physicians, medical emergency physicians, their program directors, directors of health, and staff in specific states and areas?

State government

Central or federal government

What are the various findings?

On November 22, 2023, healthcare.gov presented a flawed scheme. On or after November 22, 2023, immediate healthcare administration reforms are required in Illinois, the United States, and worldwide. TidalHealth, Kaiser Permanente (Oakland, CA), HCA Healthcare system (Nashville, TN), and similar entities cannot maintain international standards of healthcare. Someone among them has tricked the system and tried to sideline state government departments, central government departments, and the US Constitution. State governments and central government departments have to make executive healthcare staff job appointments based on vivid rules and regulations of the existing US Constitution. You have to be a reasonable executive professional. Unreasonable executive professionals placed in an unfair manner need to be replaced. Guidelines must be available via the internet, preferably in research or investigation questions and answers, as Dr. Asif Qureshi has circulated.

What does the government need to enhance?

Community health centers

Universal health system of international standards of healthcare

International standards of justice

What are the issues?

The officers are not able to understand my issues.

The officers need to understand my issues.

I require a job relevant to my abilities and research.

Minimum: program director or the equivalent or better Maximum: Central Intelligence Agency

director or the equivalent or better

A program director researches, plans, develops, implements, and circulates one or more of the professional training programs or professional services.

I can guide 19 specific types of physicians. I can guide 33 specific types of lawyers. I can guide 60 specific categories of skills. I can guide more than 1000 different professions, including teachers, lawyers, engineers, physicians, and law enforcement. Take a look at this:

[www.queshiuniversity.com/biodata.html](http://www.queshiuniversity.com/biodata.html). I can guide 150 government departments. Take a look at this: [www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html). My skills and knowledge are relevant to the responsibilities of a program director. My skills and knowledge are relevant to the responsibilities of a director of the Central Intelligence Agency.

Take a look at this: [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html).

Take a look at this: [www.queshiuniversity.com/lawyers.html](http://www.queshiuniversity.com/lawyers.html).

Take a look at this: [www.queshiuniversity.com/abilitiesworld.html](http://www.queshiuniversity.com/abilitiesworld.html).

What questions must be answered by government executives via the internet?

What do you understand by universal healthcare through the government?

Who all must be replaced, including various governors and central government or federal government executives?

Who is responsible for monitoring that people are getting universal healthcare through the government?

What departments have been found to be in shambles and need to be improved on or after November 22, 2023?

What do you know about the international standards of human rights?

How are other states and countries managing without Medicaid, Medicare, and the ACA?

What are the international standards of executive health care administration in every state?

Who must appoint various medical doctors and similar executive healthcare professionals in the state, such as the Illinois Department of Health?

What is the administrative structure of various healthcare departments in various states?

If a person does not have health insurance, where does the person go for a primary care physician consultation in a specific zip code?

If a person does not have health insurance, where does the person go for a medical emergency physician consultation in a specific zip code?

How many chief medical officers are required in Illinois?

How many chief medical officers are required in every state of the United States and in all of the United States?

How many chief medical officers are required worldwide?

What was the situation relevant to these issues on April 28, 2020?

On April 28, 2020, 144 people died within 24 hours in Illinois, as reported by the director of the Illinois Department of Public Health. Comparatively, this number is far more than the number of deaths on the previous 5 days in Illinois in this situation. The focus has to be preventive and curative concepts of allopathic medicine, which is also known as evidence-based medicine or medicine based on scientific grounds. The situation needs to rearrange the issues to prolong life and enhance well-being.

What HIPAA, patient privacy, or similar issues not available to the scrutiny of specific physicians' competence are necessary to consider?

The patient goes into a coma and the supervising specific physicians are unable to answer relevant questions publicly. The patient goes into a coma and people are dying, such as those on or before April 28, 2020, in Illinois and elsewhere, and the assigned specific physicians displayed as licensed specific physicians do not know anything about cardiac arrest or coma. The assigned specific physicians must know everything about the reversible causes of cardiac arrest, the reversible causes of coma, and similar situations. They are quoting various excuses to hide facts and hide their incompetence. Emergency laws relevant to these issues are required within and outside the state. Professional regulators for physicians inside and outside the state need to be replaced on or after April 28, 2020.

How should teams be arranged and rearranged for this purpose in every state department of public health on or after April 28, 2020?

Research teams. Everyday research. New questions and answers with findings displayed publicly.

Data collection teams.

Resource mobilization teams.

Coordination teams.

Critical care physician teams in the state. You have to attend press conferences.

Law enforcement teams in every state.

Lawmaker teams in every state relevant to these issues.

Emergency medicine physician teams in the state. You have to attend press conferences.

Primary care physician teams in the state.

Patient care team monitors: Do specific physicians know everything about cardiac arrest, coma, and other relevant issues?

Circulation teams. Media. For example, ABC7 News, WBBM News, and similar entities.

Verification of diagnosis and treatment of patients in coma via the media and quality of patient care.

Equipment mobilization teams.

Audit of unscientific activities, including those carried out by medical examiner teams.

Preparation for any other epidemic or pandemic in the future.

Monitoring the progress of teams. Surveillance teams in the state, in other states, and/or on other continents.

You can count on Doctor Asif Qureshi to guide all the mentioned teams. I will communicate from my home office at 5042 N. Winthrop Ave. #237, Chicago, Illinois 60640.

[www.queshiuniversity.com/criticalcareworld.html](http://www.queshiuniversity.com/criticalcareworld.html)

## Universal Health Care

How does Dr. Asif Qureshi elaborate on this issue?

How do you manage these issues on or after December 18, 2023?

Who must further manage these issues on or after December 18, 2023?

What is universal health care in the United States on or after December 18, 2023?

Where is executive remuneration, income, and credits for Dr. Asif Qureshi for these services?

How about making Dr. Asif Qureshi Chairman of the United States Senate Committee on Health, Education, Labor, and Pensions?

Fifty percent of existing healthcare budgets from state, county, city, and central or federal governments need to be mobilized for universal health care in the United States on or after December 18, 2023: How do you plan to manage this situation?

## Who received these facts from Dr. Asif Qureshi on or after December 18, 2023?

The White House

United States Department of the Interior

United States Senate Committee on Appropriations

United States Senate Committee on the Budget

United States Senate Committee on Health, Education, Labor, and Pensions

<https://www.help.senate.gov/about/members>

The White House

<https://www.whitehouse.gov/contact/>

United States Department of the Interior

<https://www.doi.gov/>

United States Senate Committee on Appropriations

Chair

Senator Patty Murray (Democrat - Washington)

Jerry Moran (Republican - Kansas)

United States Senate Committee on the Budget

Senator Ron Wyden (D - OR)

Senator Mike Crapo (R - ID)

United States Senate Committee on Health, Education, Labor, and Pensions

Maggie Hassan

(Democrat - NH)

Mike Braun

(Republican - IN)

Dr. Asif Qureshi has done his part in conducting executive public health research. Understand what is written here are issues that will be vivid.

Take a look at this: [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html). Take a look at these resources:

[www.queshiuniversity.com/healthdepartment.html](http://www.queshiuniversity.com/healthdepartment.html) and

[www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html).

You have to do your part for executive public service.

On December 14, 2023, this was circulated. About 1 in 12 of American respondents either postponed or did not seek a consultation for their medical problem or get a recommended medical test, treatment, or follow-up examination due to high out-of-pocket costs for health care. The harms are more than evident.

Healthcare offenses: What are various examples?

1. Governor of the state gets a violation for failing to provide universal health care.

2. Failure to conduct executive research themselves to improve public services at the executive level.

Failure to take to the public executive research guidelines from Dr. Asif Qureshi that was initiated and continued by the government. Take a look at this: [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html). Take a

look at these resources: [www.queshiuniversity.com/healthdepartment.html](http://www.queshiuniversity.com/healthdepartment.html) and

[www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html).

3. Accessibility, availability, affordability, quality of care, standard of healthcare, and accountability relevant to public services.

What are various harms of executives who get large salaries and earned income while not having the relevant skills or knowledge, resulting in harms on others? Read the findings at:

<https://www.qureshiuniversity.com/healthdepartment.html>.

Illiterates have been given executive jobs in the government.

They do not have problem-solving skills relevant to their executive job. This is not fair or justified.

Some lawmakers in the United States do not have answers to questions relevant to their executive job and need to be replaced.

## Health Department

### Medical colleges in the United States: What are the issues?

There was not even one medical college in the United States that had displayed guidelines the way Dr. Asif Qureshi had authored, in a question-and-answer format for specific physicians via the Internet [www.qureshiuniversity.com/physicians.html](http://www.qureshiuniversity.com/physicians.html) on or before January 7, 2024. Government departments must provide reimbursements for Dr. Asif Qureshi for his 23 years of executive research from 1999 to 2023 in Chicago, Illinois, United States. Other medical colleges worldwide at executive levels could not display similar guidelines in a question-and-answer format for specific physicians the way Dr. Asif Qureshi authored and displayed them via the Internet [www.qureshiuniversity.com/physicians.html](http://www.qureshiuniversity.com/physicians.html) on or before January 7, 2024. The World Health Organization and similar organizations worldwide owe Dr. Asif Qureshi executive remuneration, reimbursement, and credits for his work.

### How is the medical education Dr. Asif Qureshi provides for specific physicians in the United States far better than the medical education that other medical schools in the United States and worldwide provide?

1. Dr. Asif Qureshi has displayed executive research relevant to specific physicians in a question-and-answer format, unlike other medical schools in the United States and worldwide that have not displayed similar executive research relevant to specific physicians in a question-and-answer format on or before January 1, 2024.

2. Consider the tuition required for medical schools in the United States (<https://www.qureshiuniversity.com/tuition.html>) and compare it to what Dr. Asif Qureshi provides to specific existing physicians and aspiring physicians in the United States and worldwide: <http://www.qureshiuniversity.com/physicians.html>

<https://www.qureshiuniversity.com/medicalcolleges.html>

<https://www.qureshiuniversity.com/tuition.html>

3. Dr. Asif Qureshi must be approved for significant grants to maintain these resources and enhance further executive research relevant to specific professions. Server services are required, internet services are required, and computers are required. This work requires significant resources and grants.

## What must executives of human resources in Illinois, the United States, and the reformed UN place on record?

Dr. Asif Qureshi did executive research from May 10, 1999, until November 22, 2023, in Chicago, Illinois, United States, as displayed at [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html) and [www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html). He has spent 8 hours per day, 56 hours per week doing this executive research. The circumstances of the issue included an assignment from Social Security that was transferred to the Illinois Department of Human Services from 1999 to 2023. The response/results of the issue included pleasant resources like [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html) and [www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html). Dr. Asif Qureshi authored these resources. He can guide 19 specific types of physicians. He can guide 33 types of lawyers. He can guide more than 1000 different professions, including teachers, lawyers, engineers, physicians, and executive administrators. He has authored more than 5 non-fiction books.

Dr. Asif Qureshi conducted this executive research at 5042 North Winthrop Avenue Unit 237, Chicago, Illinois 60640 United States from May 11, 1999, until November 22, 2023.

The Social Security claims specialist directed him to maintain his home office at 5042 North Winthrop Avenue Unit 237, Chicago, Illinois 60640 United States and enlist all 12 years of his high school education, 4.5 years of his education as a medical doctor, and 7 years of in-hospital experience as a medical doctor, particularly a medical emergency physician. The location of the executive research assigned by the Social Security and transferred to the Illinois Department of Human Services has mainly been online, as displayed at [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html) and [www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html).

The executive research was assisted by Arnold Friedman, assistant professor at Syracuse University in New York, via [www.servicescape.com](http://www.servicescape.com). The executive research was conducted over 22 years, from May 10, 1999, to November 22, 2023, in Chicago, Illinois, United States. The population served and audience have been American, Asian, Africans, Australians, and those in Latin America or on islands. The prominent lead executive investigator of the executive research was Dr. Asif Qureshi. The issue started in a pleasant manner, and the executive research resulted in a pleasant display of executive guidelines at [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html) and [www.queshiuniversity.com/departments.html](http://www.queshiuniversity.com/departments.html).

The Social Security claims specialist in Chicago, Illinois, United States, revealed to Dr. Asif Qureshi that Medicaid, Medicare, and similar recipients and clients enrolled with these services go to a physician to address their ailments that these individuals can manage themselves via the internet. Dr. Asif Qureshi needs to display guidelines via the internet so that recipients and clients enrolled in Medicaid, Medicare, and similar entities first review the guidelines created by Dr. Asif Qureshi. In this way, Medicaid, Medicare, and similar entities can save billable consultations for 20, 40, and 60 dollars while recipients and clients enrolled with these services first manage issues themselves via the internet. Medicaid, Medicare, [healthcare.gov](http://healthcare.gov): You have to forward resources, remunerations, and an executive salary for Dr. Asif Qureshi for these resources [www.queshiuniversity.com/physicians.html](http://www.queshiuniversity.com/physicians.html). Job title: program director or the equivalent or better. Salary: executive salary.

These guidelines are more than what Social Security expected. See the guidelines created by Dr. Asif Qureshi for 19 specific types of physicians that cost them at least \$75,000 and another 1000 similar other professions at [www.queshiuniversity.com/professionsworld.html](http://www.queshiuniversity.com/professionsworld.html).

They expected the 20-, 40-, and 60-dollar consultations to be saved via the internet guidelines created by Dr. Asif Qureshi.

Some resources from California are asking 750 dollars for 1 consultation.

Here are guidelines Dr. Asif Qureshi created: [www.queshiuniversity.com/psychiatryworld.html](http://www.queshiuniversity.com/psychiatryworld.html).

Those who are asking 750 dollars for 1 psychiatric consultation have not displayed guidelines the way Dr. Asif Qureshi has displayed them.

Are these guidelines from Dr. Asif Qureshi online also relevant to existing specific physicians, administrators, medical students, and similar others?

Yes.

Who all must forward executive remuneration, salary, retroactive credits, and reimbursements to Dr. Asif Qureshi for these professional services?

Illinois government

United States government

## Harms

### What are various harms of executives who get large salaries not having the relevant skills and knowledge?

Refer to the harms and negligence of others from January 1, 2019, until March 8, 2023.

Healthcare executive did not have the skills and knowledge of a human being in a coma despite at least 6,806,029 individuals going into comas and dying between January 1, 2019, and March 8, 2023. Refer to the deaths from January 1, 2019, until March 8, 2023. They falsely gave viral infections as the cause of all these deaths. Not all of these deaths were due to viral infections. All auditors must know that there are at least 47 causes of comas that need proper treatment. Who all must be punished for these harms while they were responsible for these patients?

### What needs to happen at the executive level of the World Health Organization (WHO) on or after December 11, 2023?

1. Replace most executives for not having the skills and knowledge relevant to their executive jobs.
2. Provide worldwide medical education programs for specific medical doctors and healthcare administrators, displaying the guidelines, questions, and answers from Dr. Asif Qureshi.
3. Standardize essential medicines list in detailed questions and answers the way Dr. Asif Qureshi has done at [www.qureshiuniversity.com/essentialmedicines.html](http://www.qureshiuniversity.com/essentialmedicines.html).
4. Provide executive education relevant to universal healthcare worldwide, including the United States.
5. Replace most of the healthcare administrators at the executive level in Illinois and the United States for not having the skills and knowledge relevant to their executive jobs.

At least 6,806,029 individuals went into a coma and died between January 1, 2019, and March 8, 2023. Healthcare administrators falsely gave viral infections as the cause of all these deaths. Not all of these deaths were due to viral infections. All auditors must know that there are at least 47 causes of comas that need proper treatment. [Who all must be punished for these harms while they were responsible for these patients?](#)

### Who all did not have the skills and knowledge about a human being in a coma on or before March 6, 2023, and needed to be replaced on or after March 6, 2023?

1. United States Department of Health and Human Services Secretary Xavier Becerra  
[media@hhs.gov](mailto:media@hhs.gov) <https://www.hhs.gov/about/index.html>

2. Director-General of the World Health Organization Tedros Adhanom Ghebreyesus
